

NR, NR4

In-line Pumps

$n \approx 2900$ rpm
 $n \approx 1450$ rpm

Construction

Close-coupled, single-impeller, centrifugal pumps; electric motor with extended shaft directly connected to the pump. Pump casing with suction and delivery connections with the same diameter and on the same axis (in-line).

Connections: Flanges PN 10, EN 1092-2.

Counterflanges (on request)

Sizes	Flanges
NR, NR4 32,40,50,65	Screwed flanges PN 16, EN 1092-1
NR4 100, NR4 125	Flanges for welding PN 10, EN 1092-1

Version with frequency converter (on request)

Applications

For clean liquids, without abrasives, which are non-aggressive for the pump materials (contents of solids up to 0.2%).
 For heating, conditioning, cooling and circulation plants.
 For civil and industrial applications.
 When low noise operation is required ($n \approx 1450$ rpm).

Operating conditions

Liquid temperature from -10 °C to $+90$ °C.
 Ambient temperature up to 40 °C.
 Total suction lift up to 7 m.
 Maximum permissible working pressure up to 10 bar.
 Continuous duty.

The electropumps NR, NR4 series comply with the European Regulation no. 547/2012.

Materials

Component	Material
Pump casing Lantern bracket	Cast iron GJL 200 EN 1561
Impeller	Cast iron GJL 200 EN 1561 (Brass P-Cu Zn Pb 2 EN 1982 for NR-NR4 32,40,50)
Shaft	Chrome-nickel steel AISI 303 for pumps up to 1.1 kW Chrome steel AISI 430 for pumps from 1.5 to 18,5 kW
Mecanical seal	Carbon - Ceramic - NBR
Counterflanges	Steel Fe 42 UNI 7070

Special features on request

- Other voltages. - Protection IP 55. - Frequency 60 Hz
- Special mechanical seal. - Higher or lower liquid or ambient temperatures.
- Motor suitable for operation with frequency converter up to 0,55 kW for NR4 and up to 0,75 kW for NR.

Motor

2-pole induction motor, 50 Hz ($n \approx 2900$ rpm).
NR : three-phase $230/400$ V $\pm 10\%$ up to 3 kW;
 $400/690$ V $\pm 10\%$ from 4 to 18,5 kW.
NRM : single-phase 230 V $\pm 10\%$.
 4-pole induction motor, 50 Hz ($n \approx 1450$ rpm).
NR4: three-phase $230/400$ V $\pm 10\%$ up to 3 kW;
 $400/690$ V $\pm 10\%$ for 4 kW.
NRM4: single-phase 230 V $\pm 10\%$.

Insulation class F.
 Protection IP 54.
 Motor suitable for operation with frequency converter from 0,75 kW for NR4 and from 1,1 kW for NR.
Classification scheme IE3 for three-phase motors from 0,75 kW.
 Constructed in accordance with EN 60034-1, EN 60034-30-1.
 EN 60335-1, EN 60335-2-41.

Coverage chart

Pumps with frequency converter

The **NR EI, NR4 EI**, pumps are available with power from 0,25 kW up to 18,5 kW, the pumps are equipped with **I-MAT** installed on board which allows to realize a variable-speed system extremely compact and efficient, ideal in applications of water supply and in the distribution of hot and cold water.

The pump is equipped with transducers suitable for operation and is already programmed at the factory.

Advantages

- Energy saving
- Compact design
- Easy to use
- Programmable to suit the system requirements
- Reliability

Costruction

The system comprises of:

- Pump
- Induction motor
- I-MAT Frequency converter
- Motor adapter for the motor mounting of the frequency converter
- Connection cable between frequency converter and induction motor
- Transducers

Main features

Rated motor power output from 0,25 kW to 18,5 kW

Control range from 1750 to 2900 rpm (2-pole)

Control range from 870 to 1450 rpm (4-pole)

Protection against dry running

Protection against operations with closed valve ports

Protection against system leakages

Protection against overcurrent in the motor

Protection agains overvoltage and undervoltage of the power supply

Protection against current unbalances between phases

Operating modes

Constant pressure mode with pressure transducer

In this mode, the system maintains the preset pressure when the flow required by the installation changes.

Proportional pressure mode with pressure transducer

In this mode the system changes the working pressure according to the required flow rate.

Constant flow mode with flow meter

In this mode the system maintains a constant flow rate value in a point of the installation according to the required pressure.

Fixed speed mode with setting of the speed preferential rotation.

In this mode, by changing the working frequency, you may choose any operational curve included within the working range.

Constant temperature mode with temperature transducer

In this mode the system keeps the temperature constant inside a system by changing the speed of the pump.

Features

New Compact Design

A compact structure allows for simple installation even in confined spaces

A Unique Design

An innovative guard (patented) prevents contact with rotating parts, providing protection to the end user whilst allowing for inspection of the mechanical seal.

Advanced hydraulics

Optimum impeller geometry provides maximum efficiency and excellent suction characteristics.

Silent operation

Specially designed fluid ducts provide very quiet operation

Exceptional Fluid Dynamics

The fluid dynamics through the impeller and casing are designed to minimize losses and increase performance.
