Series MX filters

MX2 ports: G3/8, G1/2, G3/4 - MX3 ports: G3/4, G1 Modular Bowl with technopolymer cover and bayonet-type mounting

The Series MX air treatment components are characterized by a modern, linear and compact design, offering high performances. The perfect integration between metal alloys and technopolymers has allowed the realization of a reliable product, light and strong at the same time. Thanks to a new concept of modularity, moreover, the mounting of components has become easier. The Series MX has been realized to offer a multi-sector solution that guarantees saving in terms of installation time, space and costs.

A special configurator, available on Camozzi website at http://catalogue. camozzi.com (Configurators section), allows the customer to choose the most suitable solution for his application, selecting single components or by configuring assembled FRLs.
